
Professional Summary:

A passionate Computer Science Engineering with 1.5 years of hands-on experience in web technologies, skilled in programming, problem-solving, design, and critical thinking. Proficient in developing efficient and innovative solutions, with strong communication and teamwork abilities, dedicated to continuous learning and contributing effectively to software development and technology-driven projects.

Education :

Stella mary's College of Engineering	2026
- (Bachelor of Computer Science and Engineering)	
St.Bernadette's Higher Secondary School	2022
- (Computer Science)	

Project and Technical Experience :

Football Club Management System

- Description: A management system featuring a modular dashboard.
- Key Features: Match tracking, player management, and tournament organization.
- Technologies Used: React.js, Tailwind CSS, and Supabase.
- Link: fcms.netlify.app

Weather Prediction web application

- Description: A responsive weather application providing real-time data.
- Key Features: Geo-location-based auto-detection, city search, unit conversion, dynamic theming, and 5-day forecasting. It includes robust error handling.
- Technologies Used: TypeScript and responsive UI components , using the OpenWeatherMap API.
- Link: prime-weather.netlify.app

Object Scanner web application

- Description: A real-time web application that detects and identifies objects using the device's camera.
- Key Features: Real-time object identification using the device's camera.
- Technologies Used: Built with HTML, CSS, JavaScript, and powered by TensorFlow.js with the coco-ssd model.
- Link: prime-obscan.netlify.app

Portfolio Website

- Description: A stunning, responsive personal website that showcases skills, certifications, and projects.
 - Key Features: Displays professional summary, educational background, technical skills, and links to deployed projects.
 - Technologies Used: HTML, CSS, and JavaScript.
 - Link: primsajun.netlify.app
-

Skills and Knowledges :

Design & Visual Tools : Figma | Adobe Illustrator | Canva

Client-Side Technologies : HTML | CSS | React.js | JavaScript

Backend & Data Systems : Java | SQL | Supabase

DevOps & Deployment : Git | GitHub | AWS | Vercel | Netlify

Productivity Tools : MS Word | Excel | PowerPoint

Soft Skills : Decision-Making, Teamwork/Collaboration, Problem-Solving, Communication, Adaptability, Critical Thinking.

Certifications:

- JavaScript Foundations Professional Certificate by Mozilla([linkedin.com/in/prim-sajun](https://www.linkedin.com/in/prim-sajun))
- AWS Academy Graduate-AWS Academy Cloud Foundation([linkedin.com/in/prim-sajun](https://www.linkedin.com/in/prim-sajun))
